

Mohamed Oraby

Software Engineer | ASP.NET Back-End Developer

Address: Egypt, Cairo

Email: mohamed.khalid.gamal@gmail.com

Phone: +201208473203

LinkedIn: <http://www.linkedin.com/in/mohamed-khalid-gamal>

GitHub: <https://github.com/mohamed-khalid-gamal>

Summary

Enthusiastic Computer Science undergraduate (Ain Shams University, Class of 2026, GPA 3.7/4.0) with a solid foundation in C++, Python, and software development. Experienced in back-end development, data structures, and algorithms, with a keen interest in system-level programming and optimization. Proven mentor and team collaborator, eager to contribute to innovative projects and grow within a dynamic internship environment.

Education

Bachelor of Science in Computer and Information Sciences

Ain Shams University, Cairo, Egypt (Expected June 2026)

- **GPA:** 3.7/4.0
- **Key Coursework:** Database Design, Operating Systems, Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, Software Engineering, Computer Networks, Linear Algebra, Probability, Computer Vision, Computer Graphics

Technical Skills

- **Languages:** C#, C++, Java, Python, JavaScript
- **Web & Frameworks:** ASP.NET Core, ASP.NET MVC, RESTful Web API, JWT Authentication, Entity Framework Core, LINQ, ADO.NET, Dapper
- **Databases:** SQL Server, MySQL
- **Tools & Version Control:** Visual Studio 2022, Git, GitHub, Swagger
- **Concepts:** OOP, SOLID Principles, Design Patterns, Data Structures, Algorithms, Software Architecture, HTTP Client & System Integration

Relative Experience and Activities

ASP .NET Engineer Intern

Ejada Company , Egypt , Cairo | July 2025 – present

- Work on Back-End Real Projects With ASP.NET with a strong Team in Ejada Company and learn a lot of things Like : Microservices , SignalR ,.....etc

Web Development Workshop Organizer

Faculty of Computer and Information Sciences, Ain Shams University | Jun 2024 – Feb 2025

- Designed and led advanced workshops on SASS, ES6, jQuery, and Bootstrap for 50+ students.
- Managed both online and in-person training materials; recorded and published sessions [Playlist](#).

DEMI Coding Instructor

iSchool, Cairo, Egypt | Oct 2024 – Present

- Taught Python and introductory machine learning concepts to 25+ sixth-grade students.
- Utilized Scratch, mBlock, and Pictoblocks to simplify AI principles for beginners.

Head of Web in Support

Faculty of Computer And information Science Ain Sham University – Present

- Led a team of 20 members in a student activity to deliver web development education to 50+ students across two levels:
 - **Level 1:** Front-end development using React.
 - **Level 2:** Back-end development using ASP.NET.
- Guided students in building real-world projects, fostering a collaborative community and enhancing communication among participants.
- Managed curriculum design, team coordination, and student engagement to ensure effective knowledge transfer and project success.

Member in ACMASCIS

Faculty of Computer And information Science Ain Sham University | OCT 2024

- Active member of ACMASCIS, a student activity focused on problem-solving and algorithmic challenges.
- Dedicated to solving complex problems with expertise in topics including loops, binary search, bit masks, dynamic programming (DP), recursion, data structures, standard template libraries (STLs), graph theory, number theory, combinatorics and probability, dynamic arrays, and more.
- Maintain an active profile on Codeforces ([profile](#)) with pubil rating, showcasing consistent engagement and skill development in competitive programming.

Projects

- **Elmokhtareon ([GitHub](#) – [Demo](#))**
 - **Description** : it`s a full-stack freelance project for an coding academy
 - **Used Tools/Technologies**: Visual Studio Code , Cursor , Bootstrap , HTML , CSS , Java Script , JQuery , Sweet alert , Ajax , RESTful Web API , Entity Framework Core, LINQ, Entity Framework Core , Swagger , Postman
- **FOS operating System**
 - **Description** : It`s an operating system that applying on operating system course and memory management and CPU scheduling
 - **Used Tools/Technologies**: Visual Studio , C , Eclipse
- **Map Routing ([GitHub](#))**
 - **Description** : it`s a project that applying on the graph theory by applying super source Dijkstra algorithm and the problem description that This project aims to compute the fastest route between two points (S to D) on a map, combining walking and driving through intersections, using shortest path algorithms.
 - **Used Tools/Technologies**: Visual Studio , C# , Draw library

- **Caro ([GitHub](#) – [Demo](#))**
 - **Description** : It's an E-Commerce Project applying on Asp.NET MVC and Backend Concepts
 - **Used Tools/Technologies**: Visual Studio , SQL Server , My SQL, JavaScript , CSS , Bootstrap , C# , ASP .NET , MVC , LINQ , EF Core , ASP Identity
- **HR System API Project - ASP.NET Core Web API ([GitHub](#) – [Documentation](#))**
 - **Description** : Developed a robust Web API using ASP.NET Core with integrated authentication and authorization features using ASP.NET Identity. The project includes secure endpoints, data validation, and error handling, with a fully documented API using Swagger.
 - **Used Tools/Technologies**: ASP.NET Core, Entity Framework, ASP.NET Identity, Swagger, C#, RESTful API
- **VoidX - NASA Project ([GitHub](#) - [Documentation](#))**
 - **Description** : Built the backend for an app that visualizes the night sky from exoplanets, using NASA's Exoplanet Archive and star catalogs. Developed APIs for processing large-scale star data to create interactive charts and exportable images for students.
 - **Used Tools/Technologies**: ASP.NET Core, C#, Entity Framework, SQL, RESTful APIs, NASA API.
 - **Role** : Backend Developer
- **UMS Clone ([GitHub](#) - [Demo](#))**
 - **Description** : A clone of the Ain Shams University website, designed to replicate its features and user interface for learning and testing purposes.
 - **Used Tools/Technologies**: HTML, CSS, JavaScript, GitHub.
- **Spam or Ham ([GitHub](#))**
 - **Description** : A machine learning project that classifies emails as spam or not spam using various algorithms such as Logistic Regression, Random Forest, SVM, Naive Bayes, and Decision Tree.
 - **Used Tools/Technologies**: PyCharm, Python, Machine Learning, GitHub.
- **Digital Wallet ([GitHub](#))**
 - **Description** : A project focused on applying data structure concepts by implementing a digital wallet system with features such as transaction history, balance management, and account handling.
 - **Used Tools/Technologies**: Visual Studio, C++, Data Structures, GitHub.
- **Flight Reservation System ([GitHub](#))**
 - **Description** : A Java-based OOP project simulating a flight reservation system with distinct admin and user views. Admins can manage flights, and users can book tickets. The project includes UML diagrams and documentation.
 - **Used Tools/Technologies**: Visual Studio, Java, Object-Oriented Programming, GitHub.

Eligibility & Commitment

- Excellent communicator and team collaborator.
- Strong commitment to clean code, design patterns, and best practices.
- Comfortable in hybrid work environments; equipped with personal laptop (Visual Studio 2022).
- Interests: AI & Machine Learning, System Optimization, Open-Source Contributions.
